RAJESH BORKAR

Final-year B.E. student · Artificial Intelligence & Data Science

Pune, Maharashtra | +91 7420887465 | rajeshborkar04@gmail.com
github.com/raviraj12b | linkedin.com/in/rajeshborkar01

PROFILE

AI & Data Science student with hands-on work in machine learning, document intelligence, and software applications. Built forecasting pipelines, a PDF question-answering application, and deployed predictive tools. Interested in AI/ML engineering and data-focused software roles.

EXPERIENCE

Machine Learning Intern 12 Jul – 06 Sep 2026
Codtech IT Solutions Private Limited | Remote

- Built a Rossmann sales forecasting pipeline covering retail data cleaning, time-series features, model comparison, and a seven-page Streamlit dashboard.
- Audited features for leakage and compared Linear Regression and Random Forest using diagnostic plots and error metrics.
- Identified recursive prediction error accumulation and revised backtesting to use frozen history; documented the evaluation trade-off.

AI Engineer Intern 22 Dec 2025 – 31 Jan 2026
TechGeekConnect Technologies LLP

- Worked on an AI web application using Python, React.js, generative AI, LLMs, and Streamlit during a six-week internship.
- Practised application development and collaboration across the AI and web stack.

SELECTED PROJECTS

DOCUAI · Document Intelligence | **Live demo** · **Code**
Full-stack PDF question-answering application using React, FastAPI, FAISS, and Groq. Supports document-specific questions, cited answers, and navigation to source pages.

Student Performance Predictor | **Live demo** · **Code**
Built a Scikit-learn preprocessing and prediction pipeline with a Flask interface, server-side validation, and deployed score estimates from five categorical inputs.

AI PDF Summarizer | **Live demo** · **Code**
Streamlit application for Groq-powered PDF summarization with multiple summary styles and PDF/TXT export.

SKILLS

Programming & data: Python, SQL, Pandas, NumPy, Scikit-learn, Matplotlib, data cleaning, feature engineering, model evaluation

AI & applications: Retrieval-augmented generation, FAISS, LangChain, Groq, FastAPI, Flask, Streamlit, React.js, Git/GitHub

EDUCATION

B.E., Artificial Intelligence & Data Science · Expected May 2027
Shree Ramchandra College of Engineering (SRCOE), Savitribai Phule Pune University, Pune
